

# RIV2450 Pneumatic press for self-clinching throat depth 450

new

Code 4390000

8 dies included  
(4 for nuts, 4 for studs  
for M3, M4, M5, M6  
and on request M8)

RIV2450 was made to be safe, flexible, compact, economical, easy to use and maintain.

**Flexibility:** the structure of the press and its interchangeable frames allow the installation of self-clinching fasteners in box-shaped pieces, frames and metal manufactures of big dimensions, already bent and also geometrically very complex. The eccentric dies allow the installation of self-clinching fasteners very close to the edges and to the bends.

## Optional

N°4 shape for "C"-like boxes

## Technical data and features

Power	6-8 bar
Force range	7 Tons
Max sheet thickness	3 mm
Weight	400 Kg
Size of the package	730 x 1200 x 1585 mm
